SUMMARY

Graduation qualification work (master's thesis)

Dontsova Helena Dinamovny

"The possibility of universal educational actions when you build students educational transition" basic general education-secondary education in a secondary school (for example domain "Science subjects")

In today's world, education is the most important factor in forming a new quality of not only the economy, but also society as a whole. School is the main link of any educational system. It is in the school is determined by the essential part of the lives of virtually everyone.

Starting in 2015, all educational institutions of the Russian Federation to operate in conditions of realization of the Federal State educational standard of the second generation. Teachers in school now should teach not only read and write, but also impart new skills, which includes universal educational actions (UUD).

The first chapter provides the theoretical basis of the formation of a universal educational actions in the light of the GEF Ltd., analyzes the strategic directions in the general education system and educational institutions of the city of Krasnoyarsk.

In the second chapter of educational opportunities are revealed Wednesday the municipal budget educational institution "secondary school No. 72 with in-depth study of individual subjects name M.n. Tolstihina" in forming the universal training action and developed techniques of model formation of universal
